### Top 5 Reasons to Use Keysight Precision SMU Products for Solar Cell Evaluation

Keysight Parameter & Device Analyzers can improve the yields and efficiencies of your solar cells

### 1 Broad range of measurement capabilities facilitate device evaluation

#### We can help you:

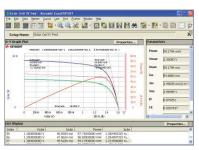

- Evaluate solar cell IV characteristics using any of Keysight Technologies, Inc. precision SMU products. This gives you great flexibility to select a solution that meets your exact needs.
- Perform CV and Cf characterizations using the B1500A's and B1505A's MFCMU module. This allows you to determine important parameters such as carrier density, defect density and charge traps.
- Make high-speed time domain measurements using the B1500A's WGFMU module. This enables you to evaluate solar cell transient characteristics without the need for any other external instruments.
- Streamline your data analysis using EasyEXPERT's intuitive and easy-to-use test environment.

B1500A Semiconductor Device Analyzer	B1505A Power Device Analyzer/ Curve Tracer	E5260A, E5270B	4155C, 4156C
--	--	----------------	--------------

IV measurement		
Symbol	Parameter name	
l <sub>sc</sub>	Short circuit current	
J	Short circuit current density	
V	Open circuit voltage	
P <sub>max</sub>	Maximum power point	
I <sub>max</sub>	Current at maximum power point	
V <sub>max</sub>	Voltage at maximum power point	
FF	Fill factor	
η	Conversion efficiency	
$R_{sh}$	Shunt resistance	
R <sub>c</sub>	Series resistance	

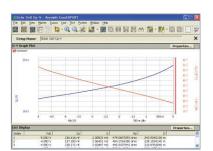

Device parameters for solar cells

IV characteristics

# Capacitance measurement Symbol Parameter name C\_p Parallel capacitance N\_c Carrier density N\_d Drive-level density

Time domain measurement				
Symbol	Parameter name			
Т	Minority carrier lifetime			
S	Surface recombination velocity			
L	Minority carrier diffusion length			

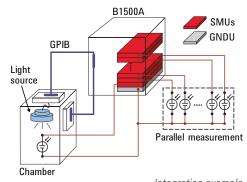

CV characteristics

## 2 Easy integration with other equipment to create a complete measurement solution

#### We can help you:

 Control other instruments and equipment over GPIB or other interfaces using EasyEXPERT software.

Integration example

### 3 Wide product portfolio covers applications from R&D through production

#### We can help you:

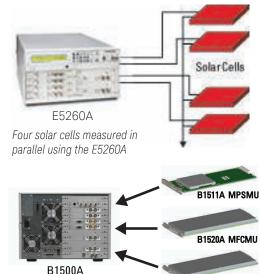

- Choose the most cost-effective solution based on your measurement needs. We have a wide variety of products, from 2-channel SMU instruments to all-inone device analyzers.
- Configure a modular solution that is both flexible and expandable. The E5260A and E5270B are 8-slot modular SMU products; the B1500A and B1505A are 10-slot products and support a variety of modules in addition to standard SMUs.
- Solve your high current and high voltage testing needs. The B1505A can measure up to ±20 A and ±3000 V, which allows it to perform both solar cell and solar module measurement.

Product number	Product name	DC specifications	
		Min resolution	Max current/ voltage
B1500A	Semiconductor Device Analyzer	0.1 fA/0.5 μV	±1 A/±200 V
B1505A	Power Device Analyzer/ Curve Tracer	10 fA/2 μV	±20 A/±3,000 V
E5260A	8-slot High Speed Measurement Mainframe	5 pA/100 μV	±1 A/±200 V
E5262A	2-channel High Speed SMU (MPSMU X2)	5 pA/100 μV	±0.2 A/±100 V
E5263A	2-channel High Speed SMU (MPSMU, HPSMU)	5 pA/100 μV	±1 A/±200 V
E5270B	8-slot Precision Measurement Mainframe	0.1 fA/0.5 μV	±1 A/±200 V
4155C	Semiconductor Parameter Analyzer	10 fA/0.2 μV	±1 A/±200 V
4156C	Precision Semiconductor Parameter Analyzer	1 fA/0.2 μV	±1 A/±200 V

### 4 Fast, efficient and expandable parallel measurement

#### We can help you:

- Increase solar cell IV measurement throughput.
   The E5260A can measure in parallel on up to 8 channels.
- Improve test execution speed. The E5260A program memory feature greatly speeds up repetitive measurements.

The B1500A and B1505A each have 10 slots for maximum flexibility.

## 5 Keysight EasyEXPERT software gets you up and running quickly

#### We can help you:

- Reduce your start-up costs. EasyEXPERT software meets the requirements of both beginning and experienced engineers.
- Improve your measurement efficiency. EasyEXPERT has built-in graphing and data analysis capabilities.
- Unify your test environment. Desktop EasyEXPERT is FREE and it supports all of the products shown in this flyer (measurement capabilities vary depending on product).
