

Keysight VOSCAL (Volume On-site Calibration)

Minimize downtime by bringing Keysight calibration equipment and expertise to your site

Fast, professional service at your site means your instruments are back at work sooner

- Reduce downtime to hours instead of days with equipment removed only for the time it takes to calibrate
- Calibrate a range of electronic test equipment from many manufacturers during a single visit
- Plan service around your production and maintenance schedules to minimize impact on your operations
- Avoid the expense of spare or rental equipment for your test system
- Save time and money with calibrations that include adjustments, as opposed to those by service providers who must send out-of-tolerance equipment to Keysight for repair

Measurement confidence comes from equipment operating with accuracy and precision

- Feel confident in measurement integrity with automated calibrations and adjustments that reduce uncertainty
- Benefit from the work of Keysight metrologists who guide standards boards and develop the measurement uncertainty calculations used in our calibration procedures
- Receive the same full complement of calibration tests worldwide, ensuring consistent service for your operations around the globe
- Reduce the risk of making incorrect measurements by working with Keysight who tests the full number of functions and full range and number of points
- Comply with ISO 17025 requirements for full pre- and post-adjustment data, for exact details on out-of-tolerance conditions

Shared expertise lowers your cost of ownership

- Get valuable technical and service knowledge from experts who know your equipment and help you operate it for a greater return on investment.
- Enjoy top-quality calibration and valuable extras—such as the latest service notes and firmware, cleaning and lubrication—proven to reduce equipment failures and out-of-tolerance conditions.
- Save time and money by eliminating inbound and outbound shipping and the risk of loss or damage during transit.
- Enhance your product and service experience with free Infoline Web services to request automatic calibration due notifications and view cal certificates and test data.
- Leverage our ongoing investment in new technology and processes with innovations such as automated diagnosis, adjustments and verification.who speak your language and understand your calibration problems

Ordering Options

Option	Duration	Benefit	Turnaround time
VOSCAL (volume on-site calibration)	1 year and multiple years	On-site calibration to minimize downtime	Hours

Service Description

- Calibrations for a comprehensive range of electronic test equipment from most manufacturers
- Mobile cal lab at your site at a time and place convenient for you
- Dedicated Keysight project manager to plan schedules, equipment lists, power requirements and more
- Equipment calibration organised in consultation with your business needs, to minimise downturn and set-up time.
- Calibration levels--such as Keysight or accredited calibration--identified prior to service
- Flexibility to meet changing business circumstances, such as the need to calibrate additional equipment
- Regular status updates to ensure the project progresses as planned
- Wrap-up meeting to review service experience and identify areas to improve

Additional services available

- VOSCAL visits scheduled outside of normal business hours or on holidays
- Calibration in situ, right on your factory floor
- Un-racking and re-racking equipment
- Upgrades to Keysight products as specified by factory service notes
- Management of major repairs through a Keysight service center
