

Test Asset Optimization Services

See. Know. Optimize.

Track and Control Services

“Saved 90% in time spent counting inventory and reduced lost assets by 65%” - customer testimonial

Your challenge

Maintaining visibility to thousands of assets: Where are they? Who has them? Are they in good working order? Are they in use?

Typical resolution

Dedicate time and labor to manually inventory and assess each physical asset. This takes weeks to months to complete every year.

Consider a better way

Follow a disciplined process to document and manage all your test assets. Use active and passive technologies to locate individual units and sustain their compliance and availability.

Benefits

- Keep track of all your multi-brand test assets across labs, locations, and users.
- Reduce time spent on physical inventory counts and compliance audits.
- Easily track the movement of crucial instruments using active and passive technologies.
- Improve the productivity of your engineering teams with fast access to compliant assets.
- Avoid write-offs of lost assets with accurate inventory-tracking systems and processes.

Track and Control Services

Keysight Professional Services team during setup¹

- Determine optimal asset organizational model
- Install PathWave Asset Advisor - Track & Control application on cloud-hosted or on-premises servers at one or multiple locations
- Organize and load all inventory records

See. Know. Optimize.

Improve ROI in Three Steps

Step 1 See

Do you have business control over your asset base with fundamentals like accurate inventory?

Track your assets

Step 2 Know

Do you have true utilization and health data to help reduce your CapEx and OpEx?

Monitor true utilization and health

Step 3 Optimize

Can you balance your existing assets with the demands of your product schedules and new technologies?

Share and loan assets across teams
