

Keysight Calibration Services for the Automotive Industry

Calibration compliance for IATF 16949:2016

Keysight Technologies can help you comply with various quality standards, such as IATF 16949:2016 for the automotive industry. **Section 7.1.5.3 of IATF 16949 requires all external calibration laboratories to be accredited to ISO/IEC 17025:2005**, and to provide calibration certificates with a national accreditation mark.

All Keysight service centers are accredited to ISO/IEC 17025, and can provide calibration certificates with an ILAC-MRA accreditation mark. (All accreditation bodies used by Keysight belong to the ILAC Mutual Recognition Arrangement, and accreditation marks include the ILAC-MRA symbol.) Keysight is also certified to ISO 9001:2015, and accredited to regional standards such as ANSI/NC SL Z540.1-1994 and Z540.3-2006.

You can rely on Keysight for all of your calibration needs. Calibrations with an accreditation body mark are now offered on a growing set of products, both Keysight and non-Keysight, and are performed via Keysight's global network of service centers and on-site calibration teams.
