How to use the FFT function in Agilent Technologies 8590 C/E/L-series spectrum analyzers

Analysis of AM using the built-in Fast Fourier Transform (FFT) of 8590 C/E/L-series spectrum analyzers is simplified with a smart user interface. FFT features include:

- AM demodulation spans from 20 Hz to 10 kHz (optional to 10 MHz)
- >50 dB dynamic range
- Automatic operation with just a few key strokes
- Continuous or single-shot operation
- Multiple markers
- Save and recall of complete FFT displays
- Signal identification

Easy close-in AM measurements

With the FFT function, it’s possible to make quick, continuous, close-in AM measurements of RF or microwave signals, such as hum measurements, even when FM is present. Mark the signal to be tested and press [AUTO FFT]. The analyzer computes and displays the FFT AM sideband spectrum in a convenient demodulation span. To change the demodulation span, just change the stop frequency.

Repeatable and convenient

Spectrum analyzer one-button measurements are repeatable, giving you confidence in the measurement of signals or components over time, temperature, and calibration variations. You can select continuous sweep to see changes as they happen, or single sweep to get snapshots of the spectra.

Increase demodulation span to 10 MHz

The FFT function with a 10 kHz maximum demodulation span, is standard in all 8590 C/E/L-series spectrum analyzers. If you install or retrofit the Fast ADC, Option 101, the maximum FFT stop frequency is increased to 10 MHz. The Fast ADC option is not available on the 8590L or 8592L.

Figure 1. Percent AM is measured on a signal source that also has FM. The measurement is refreshed with each sweep.
Ordering information

Compatible spectrum analyzers

• 8590L
• 8591C
• 8591E
• 8592L
• 8593E
• 8594E
• 8595E
• 8596E

Required configuration

• Standard, FFT stop frequency up to 10 kHz
• Fast Time-Domain Sweeps, Option 101 on 8590C/E models only, FFT stop frequency up to 10 MHz

Figure 2. While viewing the AM sidebands, you can display the time-domain source signal.

Figure 3. On-screen operation instructions assist you in making AM measurements.
Figure 4. If the input signal becomes compressed, a clipping message warns of possible false FFT responses.
Agilent Technologies’ Test and Measurement Support, Services, and Assistance

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent’s overall support policy: “Our Promise” and “Your Advantage.”

Our Promise
“Our Promise” means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage
“Your Advantage” means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and on-site education and training, as well as design, system integration, project management, and other professional services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.

By internet, phone, or fax, get assistance with all your test and measurement needs.
