The Agilent 8156A is produced to the ISO 9001 international quality system standard as part of Agilent’s commitment to continually increasing customer satisfaction through improved quality control.
Specifications describe the instrument’s warranted performance. They are measured at 1310 nm and 1550 nm using a Fabry Perot laser source, single-mode fiber and Agilent 81000AI or Agilent 81000SI connector interfaces.

</tbody>
</table>

(1) Typical, depends on performance of external connector.

(2) Includes insertion loss of two HMI-10 connectors. Typical variation over temperature range < 0.3 dB typ.

(3) Measured at constant temperature.

(4) With narrow linewidth lasers, such as DFB lasers, power fluctuations up to 0.2 dB typ. may occur.

### Ordering Information

Two connector interfaces are required for each Agilent 8156A.

**Agilent 8156A** optical attenuator mainframe (non-modular).

**Options**

- **100** standard performance version.
- **101** high performance version.
- **201** high performance, high return loss version.
- **202** back reflector kit for option 201 and option 221 (consists of 1 ea Agilent 81000SI, Agilent 81000FI, Agilent 81113PC, Agilent 81000UM, Agilent 81000BR).
- **OB2** additional operating manual.
Specifications describe the instrument’s warranted performance. They are measured at 1310 nm and 1550 nm using a Fabry Perot laser source, single-mode fiber and Agilent 81000AI or Agilent 81000SI connector interfaces.

</table>

(1) Includes insertion loss of two HMS-10 connectors. Typical variation over temperature range <0.3 dB<sub>pp</sub>.

(2) Typical, depends on performance of external connector.

(3) Measured at constant temperature.

**Ordering Information**

Three connector interfaces are required for each Agilent 8156A.

Agilent 8156A optical attenuator mainframe (non-modular).

**Options**

121 high performance version, monitor output.

221 high performance, high return loss version, monitor output.

203 back reflector kit for option 201 and option 221 (consists of 1 ea Agilent 81000SI, Agilent 81000FI, Agilent 81113PC, Agilent 81000UM, Agilent 81000BR).

OB2 additional operating manual
Specifications describe the instrument’s warranted performance. They are measured at 1300 nm using an LED source, multi-mode fiber and Agilent 81000AI connector interface.

### Optical Attenuator Specifications - Multimode Option

</table>

<sup>(1)</sup> Includes insertion loss of two HMS-10 connectors.

<sup>(2)</sup> Typical, depends on performance of external connector.

<sup>(3)</sup> Measured at constant temperature.

### Ordering Information

Two connector interfaces are required for each Agilent 8156A.

**Agilent 8156A** optical attenuator
mainframe (non-modular).

**Options**

- **350** 50/125 m multimode option.
- **OB2** additional operating manual.
Supplementary Performance Characteristics

Minimum Attenuation Step: 0.001 dB.

Settling Time: 20 ms to 400 ms (depending on actual setting).

Maximum Input Level: 23 dBm (200 mW).

Operating Modes
Attn: Attenuation is displayed and can be varied.

\( \lambda \): Entering of wavelength for automatic correction of attenuation using typical correction values.

Cal: Offset factor to adjust display within 99.99 dB range.

Disp \( \rightarrow \) Cal: Sets displayed attenuation value to 0.00 dB.

Sweep: Manual or automatic up and down sweep of attenuation. Start, stop, stepsize, and dwell time (not in manual mode) can be entered.

Back Reflect: For entering desired return loss (back reflection level). Return loss is displayed and can be varied within insertion loss and return loss of connector used. Requires Agilent 81000BR backreflector.

Enable/Disable: Optical signal path interrupted with shutter (> 80 dB blocking).

Store/Recall: 9 user-selectable parameter settings may be stored and recalled. Recall of default setting.

General

Recalibration period: 1 year.

Warm-up time: not required if previously stored within operating temperature range.

GPIB Capability: all modes and parameters can be programmed, SCPI command set, Agilent 8157A compatibility mode.

GPIB Interface Function Code: SH1, AH1, T6, L4, SR1, RL1, PP0, DC1, DTO, CO.

Environmental

Storage temperature: −40°C to +70°C.

Operating temperature: 0°C to +55°C.

Humidity: < 95% R.H. from 0°C to +40°C.

Power: 100/120/220/240 Vrms, 10%, 90 VA max., 48 – 400 Hz.

Battery Back-up (for non-volatile memory): with instrument switched off all current modes and data will be maintained for at least 10 years after delivery.

Dimensions:
89 mm H, 212.3 mm W, 345 mm D (3.5” x 8.36” x 13.6”).

Weight: net 5.3 kg (11.7 lbs), shipping 9.6 kg (21.2 lbs).
