

# Keysight X8711A IoT Device Functional Test Solution – USB 2.0 Hub (0960-3383)

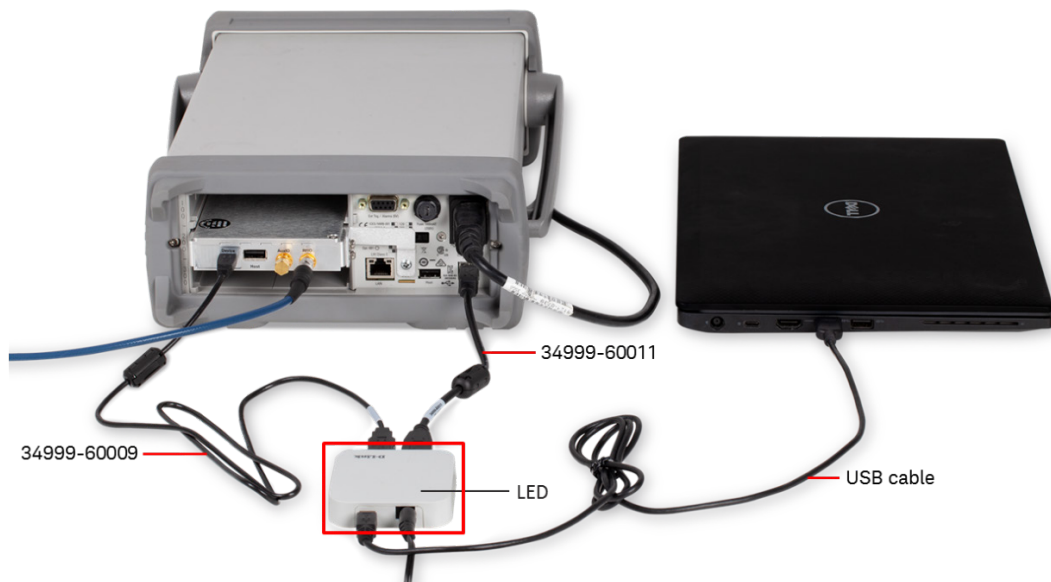

## Operating Instructions

This USB hub is designed for customers in EU region who purchased X8711A IoT Device Functional Test Solution. Please retain this update sheet.

There will be a total of three cables in the box.

1. Connect the three cables based on the image below:

- **34999-60009** : From one USB port of the USB hub to Micro-USB port of 34999A.
- **34999-60011** : From one USB port of the USB hub to the back of 34972A.
- **USB cable** : Connect the smaller (Mini-B USB) end to the back of the hub with the other end connected to a USB port on your PC.

2. Connecting the USB cable to your PC will power up the hub. A blue LED will light up as an indicator.

## Operation

Refer to the [X8711A Quick Start Guide](#) to complete hardware setup of the X8711A solution.
