

Keysight Infoline Asset Management

Manage software and equipment more effectively with access to detailed product and maintenance information at the click of a mouse

Gain greater control over your company's test and measurement assets

- Visibility into products status and location across your entire organization
- Reduced service turnaround time and maximum uptime
- Improved tracking of maintenance to maintain your budget
- eLibrary: calibration documents, manuals, software, application notes, forums and safety notes

Easily access information about assets, usage and maintenance

- Provides confidence that all your products meet quality standards
- Maximizes software, hardware, systems and service value
- Ensures products are returned to their users as soon as possible
- Includes free Keysight Infoline with any Keysight product purchase

Enhance your results with Infoline Asset Management

- Improve value obtained from assets and maintenance
- Pass audits with confidence
- Lower total cost of ownership for software and equipment across your organization

Infoline IM Asset Management helps you take control of asset management

- Access complete service and transaction records for your Keysight and non-Keysight assets around the world
- Track products and service providers with built-in tools and reports
- Streamline resolution of out-of-tolerance cases and store audit-ready records
- Increase your productivity with 24/7 access to a single database for broad and detailed asset information
- Cut costs with a cloud-based application that eliminates server, software, installation and maintenance

Keysight Infoline IM

Service Description

Get complete, accurate service records and customized views of your entire portfolio

- Define views and permissions based on job function and sort assets by location, owner, equipment type and calibration status
- Access Keysight product and maintenance records automatically
- Easily integrate other vendors' products and maintenance records

Expertly manage out-of-tolerance (OOT) cases

- Create and manage OOT case investigation workflows
- Support efficient audits with comprehensive OOT records that allow detailed searches

Maximize the value from products and services

Get the most from each asset with easy access to helpful product and maintenance information:

- Instantly retrieve manuals, safety notes, application notes, FAQs and software updates
- Provide user-defined alerts for software and hardware maintenance notifications and revisions

Anticipate and plan technology refresh:

- Receive alerts as assets approach end of support
- Get model-specific trade-in notifications and suggested upgrades and replacements

Identify and resolve critical issues:

- Use customizable dashboards to drill down to product-level maintenance, asset and business process detail
- Produce overview reports to manage maintenance-provider performance and budgets

Drive down IT costs

- Combine all asset and maintenance information in a single database
- Rely on a secure cloud application and avoid the costs of software, installation, maintenance, and self-hosted servers

Increase productivity

- Manage multiple service providers with a single source for all information
- Allow users direct access to information for their Keysight models, including maintenance requirements, to improve contingency planning and free coordinator time
- Give coordinators quick access to warranty and software contracts, with reporting capability
- Accelerate inventory tracking using handheld devices to scan barcodes or RFID tags
- Retrieve software and hardware records quickly, from inventory overviews down to individual asset details
- Access data from any Web-enabled device, anytime, anywhere

Available languages

- English, Simplified Chinese, Traditional Chinese, French, German, Korean, Japanese, Spanish, Russian, Italian, Portuguese
