Manual Printing History

The manual’s printing date and part number indicate its current edition. The printing date changes when a new edition is printed. (Minor corrections and updates that are incorporated at reprint do not cause the date to change.) The manual part number changes when extensive technical changes are incorporated.

August 2012 Edition 1
February 2015 Edition 2

Typeface Conventions

Sample (bold)  Boldface type is used when a term is defined or emphasis.

Sample (Italic)  Italic type is used for emphasis.

Sample key  Indicates a hardkey (key on the front panel or external keyboard) labeled “Sample.” “key” may be omitted.

Sample menu/button/box  Indicates a menu/button/box on the screen labeled “Sample” which can be selected/executed by clicking. “menu,” “button,” or “box” may be omitted.

Sample block/toolbar  Indicates a block (group of hardkeys) or a toolbar (setup toolbar) labeled “Sample.”

Sample 1 - Sample 2 - Sample 3  Indicates a sequential operation of Sample 1, Sample 2, and Sample 3 (menu, button, or box). “-“ may be omitted.
1 General Information

This chapter describes the Solid State Drive Kit, contents of the kit, and required tools to install the Option 038 into the Keysight E5071C.
Option 038 Solid State Drive Kit

The purpose of this kit is to install the option 028 into the Keysight E5071C.

Contents of the Keysight E5071CU Option 038 Upgrade Kit

The kit includes the parts listed in Table 1-1. If anything is missing, contact the nearest Keysight Technologies office.

This chapter describes the procedure to install the Option 038 into the Keysight E5071C.
**Option Installation**

**Introduction**

This chapter describes the procedure to install Option 038 into the E5071C. The procedure consists of the following items.

- Installation Requirement
- Backing Up Option Data
- Removal Procedure
- Replacement Procedure
- Restoring Option Data
- Writing System Correction Data of Backup Memory to Removable Drive
- Calibration of the Touch Screen

**Update Procedure for Solid State disk**

**Installation Requirement**

- 5188-4426 Key for solid state disk Carrier

**Backing Up Option Data**

**Step 1.** Copy RECOVERY(E)\LICENSE\gen.lic from the original SSD to USB pen drive.

---

**NOTE**

The license keys are kept in a text file (.lic) located at RECOVERY(E)\LICENSE\gen.lic. When you change the removal solid state disk, copy the file as back up. Even if you lost the file, you can activate the option again if you have the license number. You can re-create the license number at [http://www.keysight.com/find/softwarelicense](http://www.keysight.com/find/softwarelicense) with your software entitlement certificate.
Option Installation

Update Procedure for Solid State disk

Removal Procedure

Step 1. Turn off the power.

Step 2. Insert the key in the lock and turn anti-clockwise.

Step 3. Open the screw in clockwise direction.

Step 4. Press the button under the screw.

Step 5. Remove the solid state disks.

Replacement Procedure

Step 1. Insert the solid state disk into the slot.

Step 2. Turn the screw in anti-clockwise direction until it is locked.

Step 3. Turn the key to the right until it is locked.

Step 4. Remove the key.

Step 5. Turn on the E5071C.

Restoring Option Data

Step 1. Paste the gen.lic file to RECOVERY(E):\LICENSE\ on Spare-SSD from the USB pen drive.

Writing System Correction Data of Backup Memory to Removable Drive

The following is a description of the procedures to write the system correction data stored in the backup memory to the mounted removable drive.

**Step 1.** Turn on the E5071C.

---

**CAUTION**
The function for Factory image making window is only displayed when E5071C is turned on for the first time.

---

**Step 2.** Press **Macro Setup**

**Step 3.** Press **Load Project...** on the softkey menu.

**Step 4.** A dialog box appears to allow you to select a program to be loaded. Select RestoreSysCorFile.vba from the D:\Keysight\Service folder, and then press **Open** button.

**Step 5.** Press **Macro Run**

**Step 6.** RestoreSysCorFile dialog box appears (Figure 2-1). Click **OK**.

![Figure 2-1 RestoreSysCorFile Dialog Box](image)

---

**CAUTION**
Once the program has ended, restart the E5071C to enable the system correction data.

---

**CAUTION**
If touch screen does not work after the installation, refer to "Reconfiguring Touch Panel Settings".

---

**Step 7.** Calibrate the touch screen by referring to **Calibration of the Touch Screen**.
Calibration of the Touch Screen

When you have replaced the SSD on an E5071C, you have to calibrate the touch screen. Follow the procedure described below to calibrate the touch screen.

Step 1. Press System.

Step 2. Press Service Menu.

Step 3. Press Test Menu.

Step 4. Press Adjust Touch Screen.

The touch screen calibration screen (Figure 2-2) appears.

Figure 2-2  Touch Panel Calibration Screen

Step 5. Touch the x mark on the upper left with your finger. The mark x appears also on the lower left, upper right, and lower right. Touch the x marks in that order with your finger.

Touching the four locations described above with your finger automatically concludes the touch screen calibration.

NOTE

With no operation on the touch screen calibration screen for a preset time, it automatically closes and the previous measurement screen reappears.
